Accounts

<https://github.com/shrewmus>
<https://bitbucket.org/shrewmus>

Experience

Remote

2015 – Current

Web programmer.

Technical skills:

Angular 2(4)+ frontend, Php/MySQL/PostgreSQL backed, bootstrap/jquery/sass frontend, css/javascript. Yii2 framework.

Also Kohana3, Wordpress, CodeIgniter 3, Grails; ActionScript3 in past

Responsibilities:

Take decision about take in use frontend and backend technologies, database structure, API design, software architecture, using of additional libraries and frameworks.

I was SPA connected with backend via REST API. Develop websites (without design), as single, and also as part of team.

Setting up environments – linux (debian based), nginx/apache, php, composer.

Html markup. Setting up wordpress themes and plugins, make some changes via child themes.

Setting up hosting (shared / vds) etc.

Citimall

March 2014 – June 2015

<http://citimall.ru>

Backend-php programmer.

Php, mysql, Jira, Confluence, jquery;

My main responsibilities was:

Planning and controlling tasks for other developers

Planning, developing and deploying new functionality.

Fixing bugs and make changes to the legacy code.

Cherryline

May 2010 – March 2014

<http://cherryline.ru/>

Web programmer (both backend and frontend), ActionScript3 programmer.

Php, Kohana3, Mysql, Yii2, jquery, jquery-ui, GoogleMaps API, Leaflet, vanilla js – as Fullstack developer.

Take decision about frontend architecture, frameworks and technologies. I was prepared tasks for other backend and frontend developers of the project

Actionscript3, AdobeFlex, jquery, Kohana3-based backend API – as ActionScript3 programmer. (I have one of the video with demonstration one of the project stage for customer)

Develop ER database structure.

Education
